Corvette construction

Component counts, generated technology and mapping confidence

1 x Medusa-Class Reactor

GENERATES: Flight Control Systems A-Class Upgrade

Current community mapping. Mixed reactor models are grouped for organization only; shared generated-system limits depend on the actual inventory.

1 x Ceto-Class Reactor

GENERATES: Defensive Systems A-Class Upgrade

Current community mapping. Mixed reactor models are grouped for organization only; shared generated-system limits depend on the actual inventory.

3 x Titan-Class Hab

GENERATES: Cargo Systems B-Class Upgrade

Cargo-system mapping confirmed. Habs and walkways share cargo-system capacity; model the active technology count shown in your inventory. No supercharge benefit assumed.

Adjacency & evidence

Documented contacts are distinct from organizational grouping

CONFIRMED CONTACTS	EXTRA FRAGMENTS	TECHNOLOGY FAMILIES
33	2	12

01 / FAMILY CONNECTIONS

Launch Thruster	7 installed / 1 connected group(s)
Pulse Engine	8 installed / 2 connected group(s)
Shield	5 installed / 1 connected group(s)
Hyperdrive	4 installed / 1 connected group(s)
Photon	4 installed / 1 connected group(s)
Phase Beam	4 installed / 2 connected group(s)
Positron	4 installed / 1 connected group(s)
Infra Knife	4 installed / 1 connected group(s)
Cyclotron	4 installed / 1 connected group(s)
Rocket	1 installed / 1 connected group(s)
Reactor	2 installed / 1 connected group(s)
Habitation	3 installed / 1 connected group(s)

02 / CAUTIONS & METHOD

Heuristic, goal-first placement. Physical grouping is an organizational objective; only verified adjacency IDs count as documented in-game contacts.

Exact DPS, range and hidden multipliers are not calculated. Procedural rolls and installed module preferences are player supplied.

Evidence / continued

Optimization evidence, cautions and module references

CAUTION: Construction counts model active generated modules. Shared-system caps and build-order effects require matching to your actual in-game inventory.

04 / CONSTRUCTION DISCLAIMER

Unverified Corvette part mappings remain explicit in the construction manifest. Active generated modules and shared-system limits must be checked in-game.
